 - 11 Spanner (1)
 - 12 Allen Key (1)

Need Help? We've made a "Build your Buggy" video guide for you... Please visit: www.airboardpro.com to view it.

OK, lets build your Buggy...

1 Attach **Arm Holders** to **Seat Platform** using washers and bolts. Attach and tighten with **Spanner**.

2 Attach both **Arms** to both **Arm Holders** using **Long Screws** and **Nuts**. Tighten with **Spanner** and **Allen Key**.

3 Loosen **Chassis Length Adjustment Screw**, insert **Chassis Extender** into **Seat Platform** and tighten to your desired length.

4 Add **Seat** to the **Seat Platform** using the **Short Screws** and remaining **4 Nuts**. Tighten using both **Spanner** and **Allen Key**.

5 Add **Board Protector Stickers**, long ones on the front, small ones to the rear to protect your Airboard PRO shell.

6 With Buggy upside down, add your Airboard PRO to **Seat Platform** and tighten **Velcro Straps**.

7 Flip the Buggy over. **Buggy must sit 100% flush onto your hoverboard foot pads by making sure the Buggy Foot Clamp Lengths are set wide enough to accept your Airboard PRO.** Once wide enough tighten **Foot Clamp Length Adjustment Screws**.

Safety Information

Learn to ride in a safe place on flat ground and away from obstacles. Stop completely before getting off. Ride on even ground. Ride in a safe and responsible manner. Do not attempt wheelies or tricks that could result in injury. Be aware of pedestrians, obstacles and uneven ground. Keep your Airboard PRO and Buggy clean, dry and free from debris. Be patient and take the time to practice before you ride in a congested environment. Be considerate to others when using your Airboard PRO & Buggy. Please make sure you wear a helmet, protective clothing such as elbow pads, knee pads and wrist guards and also gloves to protect your hands and fingers when riding. Don't ride through puddles. Don't allow untrained riders to ride your Airboard PRO Buggy. Don't ride in a careless manner as serious injury could occur from misuse, or you could break your Airboard PRO Buggy. Don't ride on sand or mud, it won't handle and we don't advise it. Don't ride at full speed for prolonged periods as this can make it difficult for the Airboard PRO Buggy to maintain balance, as well as cause unnecessary strain on the Airboard PRO components, as well as risk your safety. It is not designed for high speeds. Only one person on the Buggy at any one time. Please take your time to understand the controls of the Airboard PRO when the Buggy is attached. Maintain safe stopping distances at all times. Maximum load 150kg. ⚠️ **Users ride at their own risk.**
